

We are proud to announce our upcoming face-to-face event:

Supporting Your Point of Care Testing (POCT) Service

Delegates who attend the event will hear from a variety of speakers who have experience in either accrediting, developing, delivering or supporting a POCT/Near Patient Testing service.

This event will benefit staff from many sectors, including, but not limited to, staff working within a retail/community pharmacy setting, GP's, Practice Nurses, and staff working within a laboratory who are already offering, or considering offering POC testing.

Learning Outcomes

By the end of the day, delegates will:

1. Have a better understanding of how to develop and deliver a POCT/Near Patient Testing service, whether it be in a primary or secondary care setting
2. Have an awareness of the factors to be considered when selecting a POCT/Near Patient Testing External Quality Assessment (EQA) provider

The day will include presentations and discussions on the following topics:

Accreditation for POC tests

Establishing a POCT service

POC testing in the community

Training and staff competency

See reverse for full programme details
